COMMUNICATION No. 001-2021-OGITT/INS

COMMUNICATION OF A NEW VERSION OF THE PERUVIAN REGISTRY TESTING (REPEC)

Publication date on the REPEC website: Lima January 6, 2021

The National Institute of Health (INS) has developed a new version of the **Peruvian Registry of Clinical Trials (REPEC) that facilitates searches, visualization and registration of data related to clinical trials carried out in Peru**, whose objective is **to serve as a source of information primary in clinical studies with pharmaceutical investigational products and medical devices.**

The General Office of Research and Technology Transfer - OGITT is responsible for the Peruvian Registry of Clinical Trials - REPEC, which is an online information system developed in its first version in 2006, after new technological changes at a global level, the INS publishes a new version of the REPEC, which can be accessed through the following link <https://repec.ins.gob.pe/>

The content of the new REPEC conforms to the standards set in the international platform for clinical trial registries of the World Health Organization regarding content, quality, validity, access, technical capacity and administrative profiles. Therefore, you are informed that as of 01/01/2021 all requests for procedures related to new clinical trials must be registered on this new REPEC virtual platform.

Likewise, there are short and instructive video tutorials to help the user, which are available at the following address [Instructional video tutorials for the new REPEC](#)

All Sponsors and OIC are encouraged to register in the new REPEC in order to provide them with their username and password, so that they can make requests for new clinical trials.

For the presentation of any modification related to an active clinical trial, it must be presented in the previous version of the REPEC link <https://www.ins.gob.pe/ensayosclinicos/>
