

**Announcement of the Foundation for the Promotion of Human Research
in Thailand, No. MSTD**

016/2567, regarding guidelines for issuing Certificates of Approval.

The Foundation for the Promotion of Human Research in Thailand oversees the operations of the Human Research Ethics Committee (CREC). The CREC was established with the objective of reviewing multi-institutional research projects or other research projects within its scope of responsibility. Its duties include reviewing research proposals and related documents from the initial application and continuously reviewing reports until the research project is completed, in order to protect the rights, safety, and well-being of research participants.

To facilitate the rapid progress of multi-institutional research projects that have been approved by the central committee, guidelines are being established for issuing separate Certificates of Approval to each research center. This ensures clarity and allows the institutional research ethics committee to use these documents as their official institutional approval without needing to prepare duplicate documents.

This is effective from now on.

Announced on June 21, 2024.

(Prof. Dr. Kwanchanok Yimtae)

Chairman of the Executive Committee

The Foundation for the Promotion of Human Research in Thailand
